

BREATHE FRESH, COOL AIR...

Scott Air-Pak

IN EVERY BREATHING HAZARD

Gauge. Custom-built, always in full view of wearer. Radium dial for maximum visibility.

Rubber face mask, with laminated safety glass lens; non-fogging. Exhalation valve permits conversation.

Cylinder. I.C.C. Approved. Every cylinder tested to 3000 lbs. pressure.

The famous Scott Demand Regulator. Basically the same as supplied by Scott to hundreds of thousands to the Army Air Forces for high altitude flight.

Shoulder Pads. Adjustable and detachable. Just another little detail to increase Air-Pak comfort.

By-Pass Valve providing a continuous flow of air to the mask, by-passing the regulator mechanism to conform with Bureau of Mines requirements.

Cylinder Clamp. A positive yet quick-releasing device. Cannot be accidentally bumped loose, yet permits cylinder replacement in 60 seconds.

Hose fittings are heavily plated for corrosion resistance, and to minimize "sparking" danger in petroleum atmospheres.

Back Plate. Anodized aluminum, formed to provide comfortable distribution of the Pak, and allowing full body and arm movements.

Hose. Neoprene-covered, with wire and neoprene core. Tested to 2 1/2 times operating pressure.

Cylinder Gauge. Shows cylinder pressure, even if valve is shut off.

Belt and harness. Aircraft quality webbing, neoprene-dipped for acid resistance.

Cylinder Valve. Another custom-built Scott part to assure dependable service.

INDISPENSABLE

FIRE-FIGHTING AND SAFETY BREATHING EQUIPMENT

- 1 No fire department can operate efficiently or safely without it.
- 2 No industrial plant can afford to overlook the safety (and economy) resulting from Air-Pak use in maintenance, or emergencies where heat, smoke, toxic gases or oxygen deficiencies may exist.

APPROVALS:

Bureau of Mines #1308
Factory Mutual #11452
States of California, Ohio,
Michigan, Penna, and others.
Canada - Dept. of Transport

THE SCOTT AIR-PAK IS INSTANTLY READY
In an emergency the Air-Pak can be placed in action, on its wearer, in less than one minute. It then instantly responds to his respiratory needs. No waiting. No uncertainty of action.

YOU CANNOT "OUT-BREATHE" THE AIR-PAK
Each inhalation provides all the air "demanded" by its wearer, regardless of his lung capacity, age, or physical condition. Therefore use of the Scott Air-Pak is not restricted to younger men, or men in top physical condition.

YOU ARE SAFE WITH THE SCOTT AIR-PAK
It does not matter what type of toxic gas is present, or if an oxygen deficiency exists, because the Scott Air-Pak wearer is completely independent of the surrounding atmosphere.*

EVERY NEEDED FEATURE FOR SAFETY, DEPENDABILITY AND LOW OPERATING COST

| | | | | | |
|--|--|--|---|--|---|
| The Scott has a gauge within the wearer's vision, exactly indicating remaining supply. A gauge that is custom-built to provide the maximum in utility. | The Scott Air-Pak has been successfully used in temperatures as extreme as from below zero to oven heat. | The Scott uses AIR exclusively, eliminating the obvious hazards of oxygen in the presence of petroleum vapors. | The Scott has acid and corrosion proof straps and fittings. Every steel surface is treated to minimize "sparking" in petroleum atmospheres. | The Scott has a gauge on the Cylinder to prevent the inadvertent use of empty or partly-empty cylinders. | The Scott has a battle-tested and emergency-proved Regulator; and a mask permitting conversation. |
|--|--|--|---|--|---|

*Some atmospheres, such as cyanide, can poison thru the skin.

WITH A Scott Air-Pak

WHAT SCOTT AIR-PAK EQUIPMENT CAN DO FOR MUNICIPAL FIRE DEPARTMENTS

- 1 Protects lives, and reduces community property losses.
- 2 Enables Chiefs to build enviable department reputations for life, health and property conservation.
- 3 Permits safe, immediate building entry under hazardous breathing conditions. Firemen can reach source of fire at once, put it out in less time and with greatly reduced water damage.
- 4 Habitual Air-Pak use increases morale and efficiency of department men.
- 5 Eliminates those mental hazards which can develop into fear and cause accidents. One man's panic can jeopardize the lives of the entire team.
- 6 Air-Paks save training time -- simple to use -- easy to handle.
- 7 Tremendously reduce equipment maintenance costs -- cylinder refills save money over costly cannister replacements.
- 8 Safe in any atmosphere -- even where petroleum vapors exist in heavy concentrations -- where the use of oxygen could be extremely dangerous.

The **Scott** *Air-Pak*

WHAT SCOTT AIR-PAK EQUIPMENT DOES FOR THE USER

- 1 Protects him completely and safely under all dangerous toxic fume and smoke conditions.
- 2 Enables him to breathe comfortably regardless of lung capacity, size or degree of exertion, adequately supplied with cool fresh air at all times.
- 3 Speeds-up action, gets him on the job faster.
- 4 Fog free vision helps him to work faster, more accurately and in greater safety.
- 5 Permits conversation, facilitates team work and safe understanding of oral instructions given during actual operations.
- 6 Permits complete freedom of action, conserves his strength and enables him to work without strain.
- 7 Eliminates mental hazards, makes disagreeable work just another routine job. Increases his efficiency and "production" under unusually difficult conditions.
- 8 Simple to use -- no complicated training or practice necessary.

THE PRODUCT THE SCOTT AIR-PAK

- 9 Rubber face mask with laminated safety glass lens; non-fogging. Clear and unrestricted vision. Exhalation valve permits conversation.
- 10 Custom built, rugged gauge in full view of wearer. Radium dial for perfect visibility. Constant positive check of available air supply. No timer, no guesswork.
- 11 The famous Scott Demand Regulator. Meticulously engineered for easier breathing. Can't be outbreathed, Basically the same unit supplied by Scott in hundreds of thousands to the Army Air forces for high altitude flight.
- 12 By-pass valve providing a continuous flow of air to the mask, by-passing the regulator mechanism to conform to Bureau of Mines requirements.
- 13 Hose fittings are heavily plated for corrosion resistance, and to minimize "sparking" danger in petroleum atmospheres.
- 14 Hose-Neoprene-covered, with wire and neoprene core. Tested to 2 1/2 times operating pressure.
- 15 Belt and harness -- Aircraft quality webbing, neotex-dipped for acid resistance -- wears better and longer.
- 16 Cylinder I.C.C. approved. Every cylinder carefully tested to 3,000# pressure.
- 17 Shoulder pads -- adjustable and detachable. Easily and quickly adjusted to comfortably fit any man regardless of size or shape.
- 18 Cylinder Clamp -- A positive, yet quick releasing device for instant cylinder change. Replacements can be made in 60 seconds. Cylinder cannot be accidentally bumped loose.

NOTE: Paragraph 22 below should read as follows:

The Air-Pak uses only cool fresh certified air, eliminating the hazard of oxygen in the presence of petroleum vapors. Comfortable, natural protection under all breathing conditions.

- 19 Back plate -- Anodized aluminum for lightness and greater comfort. Formed to provide comfortable, balanced distribution of the pack, and allows for complete freedom of movement.
- 20 Cylinder gauge shows cylinder pressure even if valve is turned off. Prevents inadvertent use of exhausted cylinders.
- 21 The Scott Air-Pak has been used successfully in temperature extremes -- from oven heat to below zero.
- 22 ~~The Air-Pak uses only cool fresh certified air, eliminating the presence of petroleum vapors. Comfortable, natural protection under all breathing conditions.~~ (SEE ABOVE NOTE)
- 23 Quick-Connect between regulator and low pressure hose saves breathing air for actual use and makes instant connection easy and positive.
- 24 Scott Air-Pak breathing equipment is "all purpose working equipment" -- not just emergency rescue apparatus.

**MAJOR CONSTRUCTION FEATURES OF THE SCOTT AIR-PAK
NOT FOUND IN COMPETITIVE DEMAND AIR OR
DEMAND OXYGEN EQUIPMENT**

- 1 Safety guard on cylinder valve.
- 2 Acid and corrosion-resistant harness.
- 3 Acid and corrosion-resistant valves, fittings.
- 4 Scott Air-Pak can be used underwater without modification. Competitors do not recommend their equipment for such use.
- 5 Custom-built cylinder valve, with a packing gland that can be tightened without dis-assembly.
- 6 A demand regulator proved, and service-tested by the thousands in post war years. In addition, a regulator, battle proved by literally millions of hours of combat use by our Army Air Forces during World War II. The Scott Demand Regulator is still standard portable equipment on every AAF bomber. No other demand regulator has had this service background. For the user, that means proved dependability.
- 7 A Harness Assembly which fits any man, large or small, and is instantly adjustable to him. Does not require time-consuming "fitting".
- 8 A Speaking Diaphragm in the mask adequately permitting conversation.
- 9 A custom-built Regulator Gauge; not a commercial gauge; water and moisture resistant, and with a luminous dial.
- 10 A fool-proof Quick Connect Fitting, connecting the mask hose to the regulator. Left uncoupled until its user is ready to enter the contaminated area, it permits conservation of air; can be instantaneously coupled with one hand, with a perfect seal, because its long guide prevents cross-threading, even with gloved hands or cold fingers.
- 11 A custom-built cylinder clamp, can't be "bumped" loose, yet is quickly released for 60 second cylinder change.

That's why the Scott Air-Pak must cost more. That's why it is worth more. All of these construction points are vital to long, dependable service.

AIR-PAKS IN ACTION

BREATHE FRESH, COOL AIR...

Scott Air-Pak

IN EVERY BREATHING HAZARD

Gauge. Custom-built; always in full view of wearer. Radium dial for maximum visibility.

The famous Scott Demand Regulator. Basically the same as supplied by Scott in hundreds of thousands to the Army Air Forces for high altitude flight.

Rubber face mask, with laminated safety glass lens; non-fogging. Exhalation valve permits conversation.

Cylinder. I.C.C. Approved. Every cylinder tested to 3000 lbs. pressure.

Shoulder Pads. Adjustable and detachable. Just another little detail to increase Air-Pak comfort.

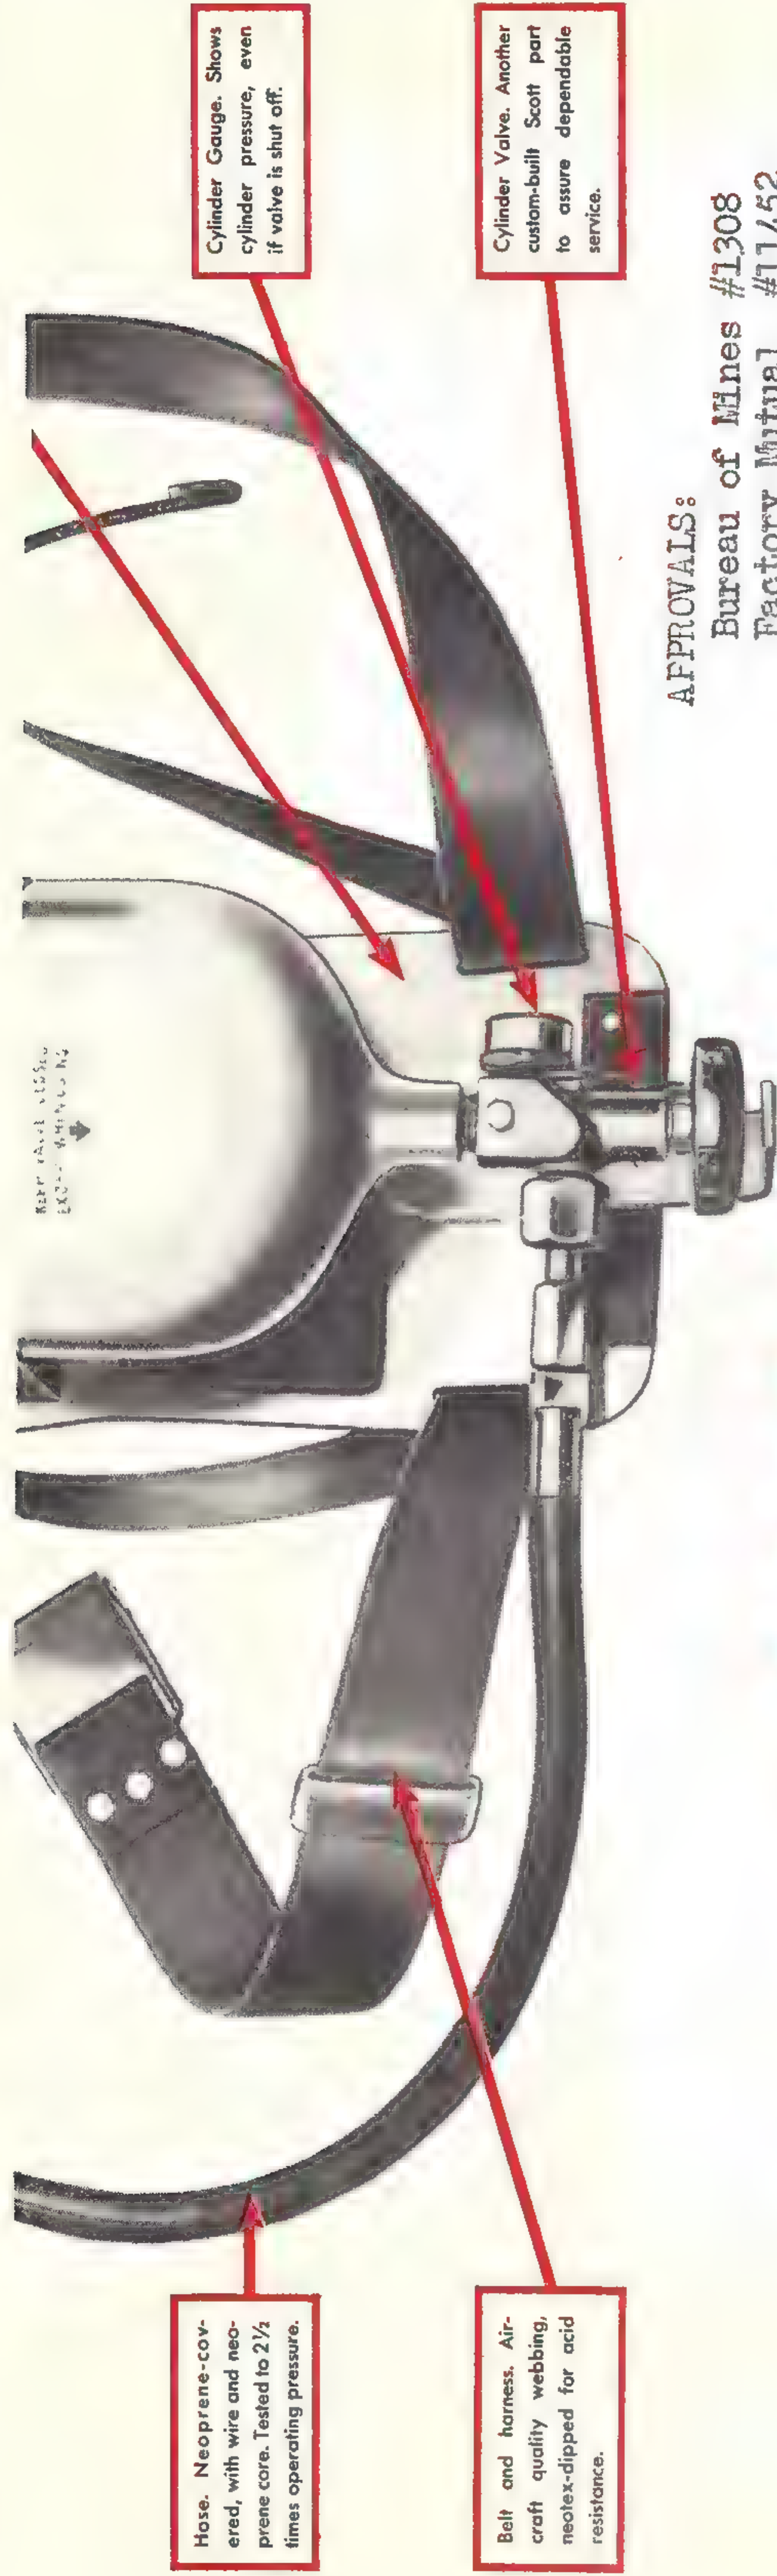

By-Pass Valve providing a continuous flow of air to the mask, by-passing the regulator mechanism to conform with Bureau of Mines requirements.

Hose fittings are heavily plated for corrosion resistance, and to minimize "sparking" danger in petroleum atmospheres.

Cylinder Clamp. A positive yet quick-releasing device. Cannot be accidentally bumped loose, yet permits cylinder replacement in 60 seconds.

Back Plate. Anodized aluminum, formed to provide comfortable distribution of the Pak, and allowing full body and arm movements.

Hose. Neoprene-covered, with wire and neoprene core. Tested to 2½ times operating pressure.

Belt and harness. Aircraft quality webbing, neotex-dipped for acid resistance.

Cylinder Gauge. Shows cylinder pressure, even if valve is shut off.

Cylinder Valve. Another custom-built Scott part to assure dependable service.

SAFETY EQUIPMENT DIVISION, SCOTT AVIATION CORPORATION

229 ERIE STREET, LANCASTER, NEW YORK

AIR-PAKS IN ACTION UNDERWATER

SCOTT PLUS Features

IMPORTANT ADVANTAGES NOT FOUND
IN OXYGEN GENERATING EQUIPMENT

THE SCOTT AIR-PAK

- 1 Is safer because it uses AIR only.
(without the hazard created by the use of oxygen breathing equipment in the presence of petroleum vapors)
- 2 Starts instantaneously -- "turn on the valve and breathe".
(without waiting for chemical reaction)
- 3 Costs less to operate. If used for a few minutes, will cost only a few pennies for recharge in your recharging system.
(without high cannister cost, for every use -- even as short as a few minutes)
- 4 Will start immediately and operate efficiently at temperatures far below zero.
(without "warm-up" of equipment in cold weather)
- 5 Signals the operator at the start....a flow of cool fresh air shows it's working.
(without wondering "is it operating?", to be wrong can be fatal)

SCOTT AIR-PAK SAVES YOU MONEY-

COMPARATIVE COST DATA SCOTT AIR-PAK VS OXYGEN GENERATING EQUIPMENT

To prove that less than 30 uses of the Air-Pak are required to wipe out the cost differential and that after "less than 30 uses", the approximate cost per complete use of the Scott Air-Pak is only \$2.50, compared to \$6.50 to \$7.50 for Oxygen Generating Equipment.

Assuming -- Purchase of 10 complete Units (including extra cylinder with Scott Equipment). Each Unit to be used ten times per year in fire service. Each Unit to be used twenty times per year in training. Total 30 complete uses.

| | <u>AIR-PAK</u> | | <u>OXYGEN EQUIPMENT</u> | |
|---|--|---------------|-------------------------|-------------|
| FIRST COST: | 10 Units @ \$197.50 | \$ 1,975.00 | 10 Units @ \$145.00 | \$ 1,450.00 |
| | 10 Extra Cylinders @ \$39.50 | <u>395.00</u> | | |
| | | \$ 2,370.00 | | |
| OPERATING COSTS: | | | | |
| If air or oxygen is completely consumed on each use. | Cylinder Refills | | | |
| | 300 required @ \$2.50 ea. | 750.00 | 300 required @ \$7.00 | 2,100.00 |
| <u>Note:</u> Any remaining air in Air-Pak can be used. Any remaining Chemical in Oxygen Equipment cannot be used. | (from \$1.00 to \$1.75 if purchaser installs a Cascade Refill system.) | | | |
| TRUE COST | AIR-PAK | \$ 3,120.00 | OXYGEN EQUIPMENT | \$ 3,550.00 |

Each year thereafter, Scott Air-Pak users would save over \$1,350.00 per year, based on 30 uses per unit per year; more if uses exceeded that number.

Your AIR-PAKS can be refilled in your department *Quickly and Economically.*

HERE'S HOW OTHER DEPARTMENTS
ARE DOING IT!

UTICA, N. Y.
Chief Leo R. Barry

CHILLICOTHE, O.
Chief Loren M. Gant

PROVIDENCE, R. I.
Chief Thomas H. Cotter

Scott Air-Paks Have the Lowest Operating Cost of any Breathing Equipment 11

Scott Distributors, or refill stations, will recharge your AIR-PAK cylinders at a surprisingly low cost, much lower than the cost of any type of cannister.

OR

AIR-PAK users may purchase their own Re-charging Systems, permitting immediate refilling on the users premises, at a cost considerably less than \$1.00 per refill.

The

Scott Air-Pak

Accepted...

**as INDISPENSABLE
FIRE-FIGHTING
and INDUSTRIAL
BREATHING
EQUIPMENT**

***Scott* AIR-PAKS are ACCEPTED by FIRE DEPARTMENTS**

A FEW TYPICAL EXAMPLES:

NEW HAVEN, CONN.

Chief Paul Heinz, nationally recognized exponent of greater fire-fighting efficiency, and Chief of one of the most efficient Departments in the world, has ordered and re-ordered Scott AIR-PAKS. AIR-PAKS are New Haven's standard Breathing Equipment.

NEW YORK CITY

"Scott AIR-PAK unanimously chosen as the standard self-contained breathing equipment of the New York City Fire Department."

WICHITA, KANSAS

"We feel the use of AIR-PAKS held what could have been a \$200,000.00 loss to \$5,000.00."
Chief C. W. Brown.

MASSILLON, OHIO

"Without Scott AIR-PAK, the men could not have entered the building with the resulting loss of probably \$200,000 in building and contents, in contrast to the actual complete loss to building and contents of only \$1,000."

TORONTO, ONTARIO

"The AIR-PAK works ideally in fighting smoky blazes."

PROVIDENCE, R. I.

"Tested AIR-PAK in 1946. Bought some. Re-ordered in 1947 to equip every fire company. At least two AIR-PAKS at every fire."

FERNDAL, MICHIGAN

"Three children trapped—overcome by smoke—rescued by 2 AIR-PAK-equipped firemen."
Another example of fast, life-saving action made possible by the use of Scott AIR-PAKS.

...AND THERE ARE HUNDREDS MORE.

Buy SCOTT AIR-PAKS WITH Assurance ~

The Scott Air-Pak is the direct result of the vast experience gained throughout the war in the design and manufacture of oxygen breathing apparatus. While the Air-Pak uses clean Certified Pure breathing air, instead of oxygen, for obvious reasons of safety, the demand regulator is basically the same as that supplied in many thousands to the Army Air Forces. There was never one reported failure of any Scott-built regulator during the war years in the hundreds of thousands of hours of use. Here again is another Scott contribution to safety -- safe breathing under all hazardous conditions.

SCOTT AVIATION CORPORATION

LANCASTER, NEW YORK

Established 1932

Dedicated to

Safety In Flying

Safer Breathing Under
All Conditions

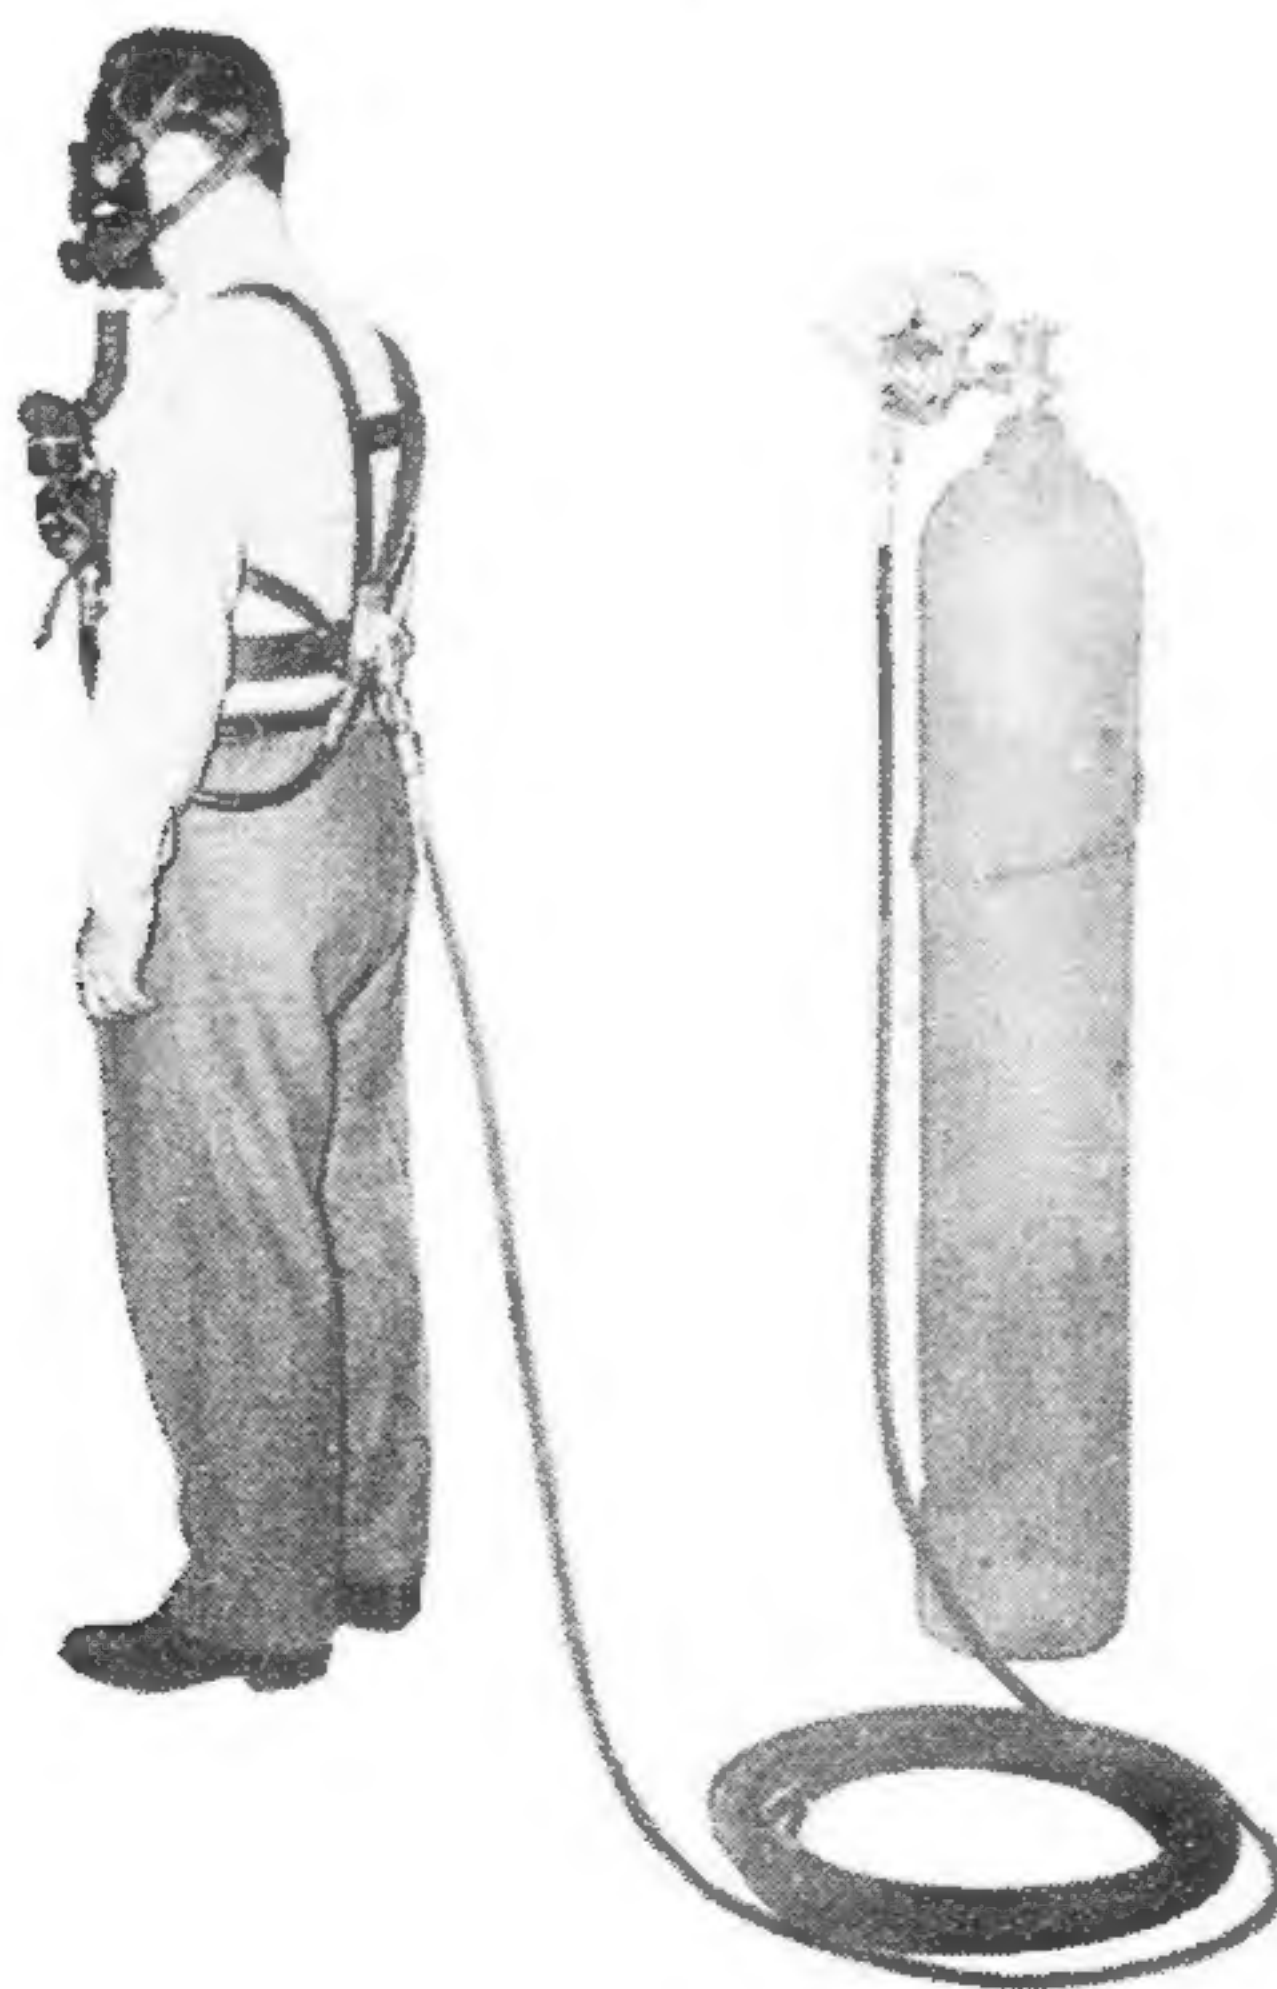

Which Scott Air-Pak will best serve your customer?

Model 6000A2M
For General Purpose

Model 6000B4A
For Shorter Uses

Model 6000C6
For "Clean-up," Underwater,
or Tank Rescue Work.
